

MS TagMatic Turbo

Change reel support for MS TagMatic for free

Dear customer,

At MS Schippers we work to continue improve our products. To serve you the best we can, we would like to inform you that the following improvement has to be used.

From 02-12-2019 we will produce the MS Tag chain standard male and female on rolls instead of inboxes. This method has the advantage that rolls can be changed easier and the quality of the tags can be secured because tags won't break or twist inside the boxes. What makes sure you can work with the MS Tagmatic without a hustle.

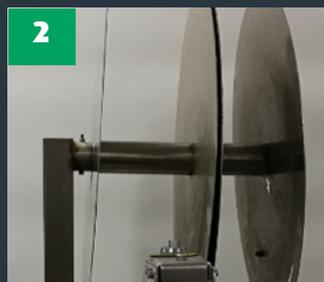

In able to use these rolls, it is necessary to modify the multi treatment unit. For instructions how to do this, please see below. We will send an extra part, the **3408928 Reel support for MS TagMatic** for free.

If you have any questions, please contact our customer service.

At the moment you use the following setup:

Remove the following part:

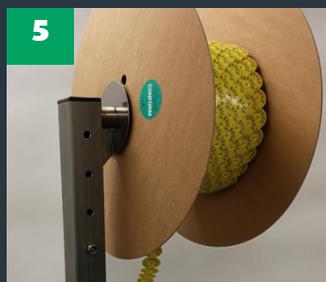

After this your setup should look like this:

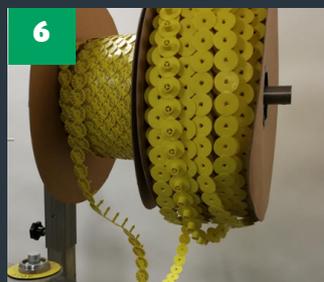

Take the **3408928 Reel support for MS TagMatic** place it in the same position as the old support and secure it with the knob:

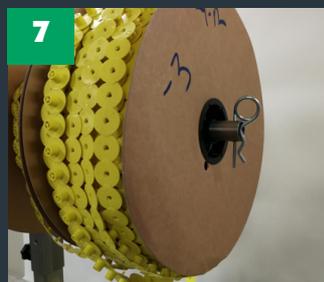

First slide the roll with the male tags over the support, please be aware of the rolling as shown on the picture below, counter clockwise:

Next slide the roll with the female tags over the support, again please be aware of the rolling, this should be clockwise:

Secure the rolls with the pin:

Insert the tags as normal and your tagmatic is ready to use.
