

“ I would not look back after making the switch to EASYFIX, just seeing how comfortable and content the cows are, a picture paints a thousand words ”

- Tom Pemberton Farm Life

EASYFIX Cubicles

EASYFIX Cubicles offer superior cow comfort, greatly enhance cow welfare, increase productivity and maximise performance.

We have sold over half a million cubicles around the globe and they remain the safest and most comfortable cubicle on the market!

- ✔ **Enhances Cow Comfort & Welfare.**
- ✔ **Increases Productivity = Higher Milk Yields.**
- ✔ **Greatly Reduces Injuries - allows cows to stand up and lie down without fear of injury which ensures they are more confident and stress free.**

EASYFIX Evolve

The Evolve Feed Fence is a pioneering advance in cattle feed systems that optimises cow comfort, welfare and performance.

We designed the Evolve to extend the cows reach and allow for increased feed intake. The open system allows cows to move in their natural feeding behaviour. Ensures a safer environment for cows and farmers.

- ✔ **Increases Feed Intakes - The feed fence increases feed intake by up to 10% due to the increased reach of cattle.**
- ✔ **Enhances Cow Comfort & Welfare - The fence eliminates injuries and marks traditionally associated with steel alternatives. It also ensures that there is zero pressure on the cow's front feet.**

EASYFIX Cow Mattresses

EASYFIX provide a wide range of cow mattresses. The **Jupiter F** is a world first, designed to provide superior levels of cow comfort. The innovative and unique design of the freestall mattress features an integrated brisket board at the front and pillows on both sides of the mat. It has a 45mm layer of PU latex foam, which creates a cushioned top surface providing maximum cow comfort with a deflection of up to 33mm. The back of the mat has a sloped, non-abrasive profile which allows animal waste to be easily pushed into the passageway. The mattress has been specially designed with a hidden interlock to create a seamless finish.

The **Neptune** cow mattress provides superior cow comfort. The cubicle mattress has a 50mm layer of latex foam and interlocks on two sides with a sloped profile at the rear.

The cow's natural resting position is supported by the soft lying area within the centre of the mat.

 **Enhances Cow Comfort & Welfare -** By encouraging a comfortable lying position for cows in the cubicle bed. Cows can stretch their front legs for maximum comfort.

 **Increases Productivity -** increased lying times = higher milk yields. Research shows that cows can lie for up to 14 hours a day. Therefore, the more comfortable you make the cows environment, the longer they will lie.

EASYFIX Rubber Matting Solutions

Suitable for Slatted Houses, Milking Parlours, Walkways & Feed Lanes

Slat Rubber Solutions

SR - High Grip

SDR - Smooth

EASYFIX provide 2 types of slat rubber matting, both designed to improve comfort, welfare & enhance performance by reducing lameness and increasing weight gains. Our SR is a high grip option and our SDR has a smooth and sloped profile that reduces ammonia emissions by over 31%.

Softfloor

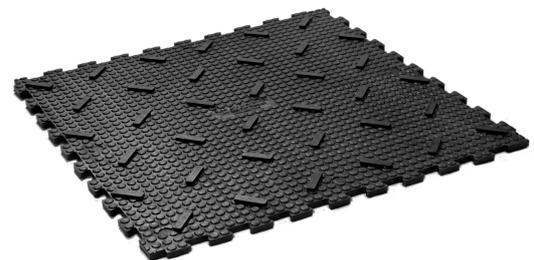

A high grip floor covering that reduces fatigue and offers a good level of comfort for operators in the parlour pit.

MG Evo SB

High grip dairy mat with a hexagonal surface that is ideal for use in milking parlours & walkways.

MG Chevron

A super grip mat that is ideal for sloped or slick floors with high traffic, such as crowding areas.
