

**For liquid feed  
quality and safety**

## Selko®-BE+

### Product Data Sheet

#### General

Selko-BE+ is a broad-spectrum synergistic mixture of organic acids that controls micro-organisms in liquid pig feed. Selko-BE+ has been formulated to control yeasts, moulds and Enterobacteriaceae in co-products and final liquid mixtures. This protects the nutritional value and safety of the feed for longer periods of time.

#### Main Ingredients

- E 200 Sorbic acid
- E 236 Formic acid
- E 260 Acetic acid
- E 270 Lactic acid
- E 280 Propionic acid
- E 295 Ammonium formate
- Benzoic acid

#### Specification

- Colour: Yellow-brown
- Appearance: Liquid
- pH: 0-2
- Specific weight: 1.15 – 1.18

#### Recommended dosage for use

For basic cleaning of the silos and for the preservation of the feed we recommend using the following concept:

| Dosage Selko-BE+ per ton liquid co-products |                  |
|---------------------------------------------|------------------|
| Whey:                                       | 0.5 - 1.5 litres |
| Brewer's yeast:                             | 1.5 - 3.0 litres |
| Wheat starch:                               | 2.0 - 3.0 litres |

For cleaning the complete feeding system we recommend the following approach:

| Dosage Selko-BE+ per ton liquid pig feed                         |                  |
|------------------------------------------------------------------|------------------|
| Day 1:                                                           | 5.0 litres       |
| Day 2:                                                           | 4.0 litres       |
| Day 3:                                                           | 3.0 litres       |
| Next 1-2 times per week, in order to prevent the new settlement: | 4.0 - 5.0 litres |

## Authorisation

---

Selko B.V. certifies herewith that the product complies with the EC admission standards, therefore the product can be sold freely in The Netherlands and exporting countries.

Selko B.V. is an approved feed-establishment, registration number: αNL 15256.

## Safety

---

Applicable safety information can be found in the Safety Data Sheet.

## Storage

---

Storage: Store above 0°C

Shelf life: 2 years after production date under proper storage conditions.

## Packaging

---

Liquid products are generally available in:

- Cans of 25 kg
- Vessels of 225 kg
- IBC of 1000 kg
