IMPROVED RECIPE

NEW KNZ™ UNIVERSAL MULTI

NOW AVAILABLE

The new **KNZ™ UNIVERSAL MULTI** salt lick contains iron carbonate instead of iron oxide. Iron carbonate creates a better taste and is better absorbable in the intestinal tract of the animal, hence it is more efficient. Additionally, this type of iron interferes less with other minerals. It is very suited to animals with a higher need of iron.

FROM RED TO WHITE

The old **KNZ™ UNIVERSAL MULTI** contained iron oxide which caused the red color of the salt lick. Iron oxide is no longer allowed as a nutritional source for animals in the European Union. Consequently, the new **KNZ™ UNIVERSAL MULTI** salt lick contains iron carbonate instead of iron oxide. Iron carbonate is white, therefore the white colour of the new **KNZ™ UNIVERSAL MULTI**.

**UNIVERSAL
MULTI
extra iron**

SALT (NaCl)	%	> 99
SODIUM	%	39,1
MAGNESIUM	%	0,2
ZINC	mg/kg	810
IODINE	mg/kg	50
SELENIUM	mg/kg	10
IRON	mg/kg	750
SUITABLE FOR USE IN ORGANIC FARMING		✓

Dairy cows need salt for good health and production. KNZ™ salt licks safeguard the salt requirement of each individual animal and complement trace minerals and vitamins requirement. Always exactly the right amount of salt, because animals will take the salt they need.
