

# RODENTICIDES

## RAT SPRAY®

**ATTRACTANT FOR MICE AND RATS**  
500ml aerosol

### CHARACTERISTICS:

Non-toxic food attractant, designed for environments such as warehouses, supermarkets, food industries and in general wherever it is necessary to carry out a rapid containment of any murine infestations.

The duration varies between 7 and 10 days depending on the environmental parameters.

### TARGET

*Rattus rattus, Rattus norvegicus, Mus musculus.*

### HOW TO USE

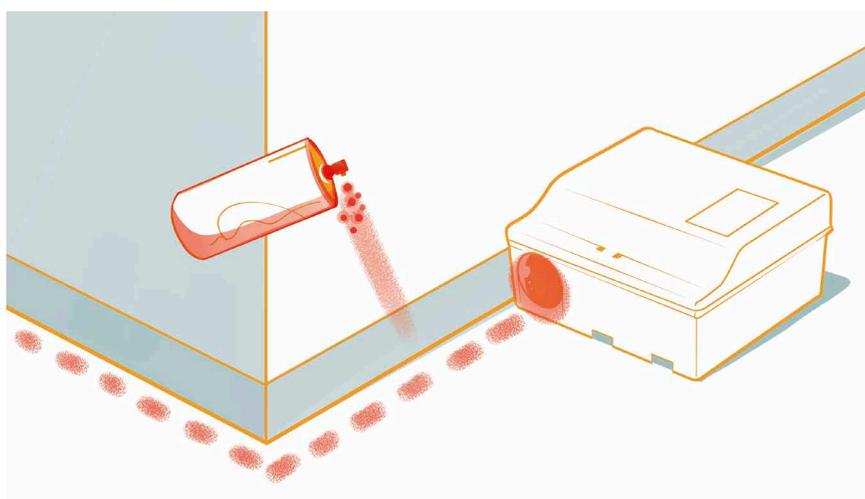

The attractant in bottle can has a double function:

- Attract the target species in your bait station, following your path
- Boost the capture power of your snap traps, glue boards or Multicatch traps.

They can be safely used also in food industries as they are free of any allergens.

### NOTE

For a correct use of the product follow the indications written on the label.
