## SECTION 2: Product Description

### 2.1. Product function

Monitoring and control

### 2.2. Product description

Specially formulated scented spray can make any trap or box highly attractive to rats (including black and brown rat) and mice. It can also be used as a bait to attract rats and mice.

Available scents: Chocolate, anise, peanut, curry

### 2.3. Active Ingredients

Flavouring with mixture of dispersing and encapsulating material

### 2.3. Packaging

Spray bottle of 100ml  
box: 25 bottles

### 2.3. Longevity

4-6 weeks

## SECTION 3: Product application

### 3.1. Trap application

Remove the lid before use. Spray directly on to the rat and mouse traps that are being used. For best results spray a light trail for the rat and mouse leading to the trap from entry points and surrounding areas.

# Sakarar® Rodent Lure

## Technical Data Sheet

Version: TDS-207-2

### 3.2. When to use

Can be used all year round when rodent infestation is detected.

### 3.3. Replacement

Apply spray every 4 - 6 weeks.

### 3.4. Trap Density

After spraying the scent on the box/trap, place the trap or box close to where rodent infestation is suspected or where recommended as part of a monitoring programme. The attractant can be used in food processing and storage facilities, factories, etc.

### 3.5. Suitable Traps

Can be used individually with any bait station or trap without a bait gun or can be used in combination with a bait gun.

## SECTION 4: DURABILITY

### 4.1. Storage

Store in a cool, dry place out of direct sunlight.  
Do not freeze.

### 4.2. Expiration

This product will last for 24 months when stored in a cool, dry place out of direct sunlight

## SECTION 5: Precautions

Handle carefully, avoid extensive contact by hand and wear gloves when handling.  
Do not eat or drink while handling this product.
