Disinfectants

MS MEGADES

MAX

MS MegaDes Max is the first patented, single-pass disinfectant formulated for intensive animal housing that targets bacteria, viruses, yeasts, fungi, and resilient parasites in **a single application at a 1% dilution**.

- **1% Dosing**
  Proven efficacy against parasites, viruses, bacteria, Mycobacteria, yeasts and fungi at 120 min.
- **2-in-1: Covers them all**
  General disinfectant & parasite control: A single pass targets a very wide range of pathogens.
- **Save time & Labor**
  Disinfect up to 5,000 m² per 20-liter container in a single, broad-spectrum pass.

Use biocides safely. Always read the label and product information before use.

Your stable perfectly disinfected

www.msgold.eu

Simplify you biosecurity protocol with MS MegaDes Max, a patented disinfectant that acts both as a universal disinfectant and specialty disinfectant against parasites. **MS MegaDes Max covers them all at 1%**.

1 Pass protocol

1. Thorough preparation. Remove all loose materials and equipment (manure, drinkers, feeders, etc.) from the housing unit and flush all coarse organic matter.
2. Coat all surfaces in the housing unit (and associated materials) with products from the MS TopFoam range. In cases of heavy fouling, pre-wet the surfaces.
3. Spray the housing unit (and all associated materials) clean using a high-pressure jet and then rinse with low-pressure water.
4. Disinfect the housing unit with **MS MegaDes Max**
5. Rinse the housing unit (and all associated materials) with clean water and allow it to dry.
6. A low-pathogen environment is created. The housing unit is ready for use again.

Broad efficacy

MS MegaDes Max covers them all at 1%

- Bacteria
- Viruses
- Yeasts
- Mycobacteria
- Parasites
- Fungi

Use biocides safely. Always read the label and product information before use.
