

MS TOPFOAM PROZYME

Powerful enzymes to clean protein

MS TopFoam Prozyme is an enzyme-fortified foaming detergent optimized to rapidly break down proteins and organic soiling in livestock settings. **MS TopFoam Prozyme** has a pleasant smell and is biodegradable.

- Powerful enzymes for efficient protein removal
- Vertical contact time 15 - 30 minutes
- Long shelf life (2 years)
- Non-corrosive
- Fresh lemongrass smell
- Biodegradable

Everything spotless and clean

Powerful enzymes to clean protein

Protein scissors

Proteases are a specific class of enzymes that act like micro-scissors to cut proteins specifically.

- **Fast Action:** They rapidly break down complex protein chains into tiny, soluble pieces.
- **Reusable:** Unlike chemicals that get "used up", enzymes stay active and can cut thousands of times.
- **Safe & Effective:** Because they are specific, they are non-corrosive to your equipment. Due to their biological nature they are completely degradable.

MS TopFoam Prozyme targets high protein contamination found in hatcheries

- down
- feathers
- meconium
- eggshells

But also high protein contamination in milking areas and other livestock applications.

- milk residues
