

Date: May 12th, 2020

To whom it may concern,

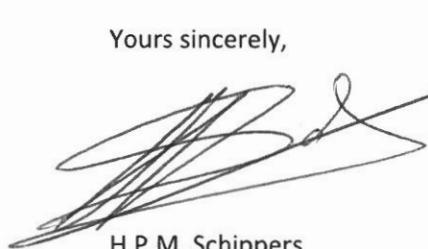

MS KiemKIII is tested at an OIE reference laboratory against African Swine Fever (ASF), strain Ba71v.

The OIE reference laboratory concludes following:

The product MS KiemKill effectively inactivated over 4.5 log10 of African swine fever virus (ASFV) at a concentration of 1:799 at 4°C within a contact time of 30 minutes. No cytotoxicity was observed at a disinfectant concentration of 1:799.

For information on OIE reference experts and laboratories please check <https://www.oie.int/scientific-expertise/reference-laboratories/list-of-laboratories/> under 'African Swine Fever'.

Yours sincerely,
