HTS-500

This 3 speed axial mist cooling fan is particularly suitable to create a wind chill effect in low and small spaces. The HTS-500 can also be used to help create air speed, so it is possible to cool the air by using a misting system.

We use these fans in places where the space is limited.

With a diameter of 50 cm and an air flow of 6,500 m³/h, with a throw of 8 meters, this fan is small but powerful.

IP54

Specifications:

Propeller diameter (mm)	450
Quantity fan blades	3
Fan dimensions (mm)	510×165
Fan diameter (mm)	500
Maximum power consumption	230V-50Hz-75W
Maximum throw (m)	7
Air speed	200m/min
Air flow	6,500 m ³ /h
Background noise level	42.2 dB
Weight	6kg
Extras	Equipped with a 3 speed switch. Supplied with multiple suspension brackets. Mounting accessories included. Suitable for outdoor installation.
